

DISCOVER THE JOURNEY

FROM SOIL TO SOLUTION

Discover how our ingredients are sourced, verified, handled and delivered to you with care.

1 ORGANIC FARMING: SUPPORTING HEALTHY SOILS

It all starts at carefully selected organic farms that follow the four principles of organic agriculture, protecting soil health, biodiversity and long-term agricultural resilience.

2 BUILDING LONG-TERM PARTNERSHIPS

Our sourcing team frequently visits our suppliers at origin to gain direct insight into quality, availability and production practices. Together with our long-term partners, we initiate and support social impact initiatives that strengthen local farming communities.

3 THIRD-PARTY SAMPLING AT ORIGIN

Before products leave origin, they are sampled and verified by independent third parties. This on-site verification safeguards integrity, authenticity and compliance with specifications.

4 RESPONSIBLE TRANSPORT

The products are transported through carefully managed logistics, primarily by sea freight and truck. This supports efficient delivery while helping reduce environmental impact.

5 QUALITY CONTROL IN BARNEVELD

Every batch is checked upon arrival in our warehouse to ensure it meets agreed specifications. This extra level of control ensures every batch meets our quality and food safety standards.

6 TAKING IT FURTHER: NATURAL PEST CONTROL

For seasonal or high-risk products, we apply special treatment in one of our 12 controlled atmosphere chambers. This natural, chemical-free method protects product quality and food safety while preserving organic integrity.

7 FLEXIBLE PACKAGING SOLUTIONS

We (re)pack products to customer needs, from small packs to large bags. Our four-line packaging facility is designed for flexibility and adaptability.

8 SAFE STORAGE & HANDLING

All products are stored and handled under a certified food safety management system in our 24,000 m² warehouse. Trained teams and clear procedures guarantee product integrity and full traceability.

9 CONVENIENT DELIVERY OR EASY PICKUP

Receive your ingredients when and where you need them. From our warehouse in the Netherlands, we support deliveries across Europe and beyond through reliable logistics partners, aligned with your planning and logistical requirements.

10 FINAL DESTINATION: WHERE INGREDIENTS BECOME PRODUCTS

The final step is yours. Ingredients become finished products that reach consumers through food manufacturers, food service providers and retailers around the world.

FROM SOIL TO SOLUTION

Organic sourcing is about more than moving ingredients from A to B. It requires trusted relationships, visibility throughout the supply chain and a deep understanding of quality at origin.

By working closely with farmers and suppliers, regularly visiting sourcing origins and maintaining rigorous quality standards, we help make organic sourcing reliable, transparent and straightforward.

Backed by over 35 years of organic expertise, direct partnerships worldwide and a dedicated quality team, we're committed to supporting your business every step of the way.

- ✓ 35+ years of organic expertise
- ✓ Direct partnerships at origin
- ✓ Fully traceable supply chain
